ASSIGNMENT BEFORE PATENT (herein "Assignment")

COPY

SECTION 1 Background

We, Edwin D. Neas and Dennis L. Templar both of Fort Collins, Colorado (herein "Inventors") invented or discovered a new and useful process, machine, manufacture, or composition of matter, or an improvement thereof, for which a Patent Cooperation Treaty (PCT) utility patent application was filed on 30 July 1999 with the U.S. Patent Office, electing several other countries, under the following title **Apparatus and Method with Vessel for Containing and Transporting a Fluent Substance**. This PCT utility application claims priority from earlier filed U.S. provisional applications filed 31 July 1998 (attorney docket numbers Chata-1, Chata-2, and Chata-3). Chata Biosystems, Inc., a Colorado corporation with a current principal place of business at 1901 Sharp Point, Unit I & J, Fort Collins, CO 80525 (herein "Company") desires to confirm, herein, the acquisition of the Inventors' entire right, title, and interest in the invention(s)/discovery(ies) disclosed in Chata-1, -2, -3 and in the PCT utility patent application more-recently filed; and the Inventors are willing to do so.

SECTION 2 Assignment of all interest to Company

In consideration of *one dollar* and other good and valuable consideration, of which receipt is acknowledged by each, the Inventors hereby confirm the sale and assignment to Company their entire right, title, and interest:

- (1) in said invention or discovery, and
- (2) in all United States and foreign applications filed therefor including but not limited to provisional, divisional, continuation, continuation-in-part, reissue, or reexamination applications, and
- (3) in *any* Letters Patent which issue in the United States or elsewhere including but not limited to: utility, utility model, or design patents; patents of implementation, improvement, or addition; inventor's certificates; and extensions of any of these, so that said right, title, and interest is held and enjoyed by Company, its successors and assigns, as fully and entirely as it would have been held and enjoyed by Inventors had this Assignment and sale never been made.

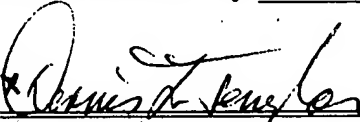

The Inventors hereby agree to *continue* to fully cooperate to execute all documents or papers necessary for obtaining Letters Patent in the United States and elsewhere (including the PCT-elected countries), and to furnish all data, information, and documentation which may be required for the preparation, filing, and prosecution of applications for said Letters Patent by the Company.

Since this Assignment is intended for recording with the patent office, the Assistant Commissioner for Patents in the US and elsewhere is hereby directed to issue any patent which may hereafter be granted, to Chata Biosystems, Inc. in accordance with this duly executed Assignment.

EXECUTED in Fort Collins, CO to be fully effective as of 1st of July 1998 by the inventors below.
